

ABOUT MILKING COWS.—It is a very bad plan to change milkers often. When you get good ones, keep them if you possibly can, even though you have to do some watching. Some milkers will do you a cow in a very short time. Some one has written, "Milkers are born, not made." There is some truth in this. Some milkers will always get more milk from a cow, on day to day, and from month to month, than others. They seem to have a natural tact for the business; while some parties can never, even with the most extended experience, learn the art satisfactorily. A rapid milker is always the best. Slow milkers are an abomination and should not be tolerated. However, we have seen negroes that were very slow at almost any other work that were expert milkers.

The same person should always if possible milk the same cows. The cows become accustomed to the one person and will not readily give down their milk to new hands for several days.

Keep good cows, feed high, and employ the best milkers that can be had.—E. M. in Southern Live Stock Journal.

From the Old Dominion.

I have been a sufferer for many years from Catarrh and Blood Taint. After the application of all the known remedies for such diseases, I found myself last summer on the very verge of the grave. Nothing seemed to do me any good. As a last resort I commenced taking S. S. S. and have taken in all 15 bottles. Before I had finished the second bottle I felt a decided improvement, and am to-day enjoying most excellent health—better than for many years. I take great pleasure, therefore, in recommending Swift's Specific for these diseases.

Richmond, Va., June 29, 1888.

Swamp Malaria Conquered.

I have been using Swift's Specific in my family for the past two years as an antidote for malaria, also as a blood purifier, with the most satisfactory results. I live on the banks of the Onchita river, in what is called the swamp country. Myself and family enjoy as good or better health than people who live in the hill country. I am confident that S. S. S. has banished the malarial poison from our system, and consequently given us good health. I use it at intervals during the spring and summer, when the system indicates being charged with poison, and it invariably drives it out.

Trenton, La., June 30, 1888.

PERFECTION

IS WHAT WE ALL AIM AT!

And to say that we have attained to that is an untruth; but to say

that by hard work and honest dealings we have established a business

in Asheville that is a source of great satisfaction to us and to

our customers, is to state "plain facts to a candid public."

In all known places in this world there are people who think

that by sending their orders away from home they can get better

and cheaper goods. For the benefit of such persons, we will make

the following broad assertion, viz.:

That we can duplicate any

bill in our line, bought by

parties outside the trade,

when freights and drayage are counted in; and in most cases that

have come under our observation we have been able to save the

purchaser from 5 to 10 per cent.

Then there are other parties who will order from New York a

barrel of Sugar and box of Tea, and when out go to their grocer

and buy 5 to 10 lbs. sugar and 1-4 lb. tea, and because they do

not get them at same prices as they paid in New York by the

barrel or box, will say that they can't pay such prices, and make

another order and pay more than they would have to pay at

home. Turks Island salt won't save such people.

We are glad to state that there are but few such people of

Asheville, and that the great majority were quick to see that it

was to their interest to buy at home. Not only the people of

Asheville, but of all Western North Carolina, are availing them-

selves of the advantages offered by us in the way of

Low Prices for the necessities of life.
